To whom it may concern,

During Brandon Smith's three consecutive Co-Op placements in the Inspections & Locates department he has proven himself to be an outstanding employee and a candidate for future employment. Throughout the two Co-Op terms that I have known Brandon he has been able to show consistent and positive growth throughout his work terms. He is very organized, dependable, and has sound judgement. He is able to work in harmony with others and is an excellent team player.

During his third Co-Op semester Brandon set aside time and started to work on the Inspections and Locates GIS Dashboard. Although Brandon did not complete this project he has taken some of the things he has learned and has started to build a brand-new web/mobile application that he will be using for his Technical Report when he graduates. I look forward to seeing what he is able to accomplish and wish him the best of luck with his future endeavours.

Best Regards,

Cory Ruiter, EIT
